

Sheikh Jayed Ahmed Noyon

Hi, I'm Sheikh Jayed Ahmed Noyon

your.email@example.com • Mars • <https://www.instagram.com/sknoyon143?igsh=cmVjYzVvbjBtOXFt> | <https://wa.me/8801756078152> | <https://www.linkedin.com/in/sheikh-jayed-ahmed-noyon08>

Professional Summary

Over more than last 2 years, I developed my frontend and backend dev skills to deliver dynamic and software and web applications.

Skills

C#, .Net, Ef Core, TailwindCSS, Auth0, React, SQLite, TailwindCSS, Blazor, .NET Core, SQLite, TailwindCSS, C++, C#, Git, Microsoft, WordPress, HTML5, CSS3, Vite.js, Blazor, Azure, Stripe, TailwindCSS

Work Experience

Freelance Developer

| Self-Employed
2025-Present

- Created a personal portfolio using Three.js, React, Vite, and WebAPI to showcase technical expertise.
- Continuously enhancing technical skills and expanding expertise in modern web development and back-end technologies.

Back-End Developer

| Car Manufacture
2023-2024

- Engineered systems for large-scale data ingestion and analysis, ensuring efficient data processing and storage.
- Developed back-end systems enabling vehicle-to-cloud communication for telemetry, diagnostics, and remote control:
 - Implemented secure APIs, following ISO 26262 automotive safety standards.
 - Ensured data privacy for customers and partners through industry-compliant protocols.
 - Delivered remote features like over-the-air updates, real-time tracking, and remote start capabilities.

Software Developer

| Security & Defense Projects
2021-2023

- Enhanced application security and developed new features, adhering to standards set by the Passive Defense Organization and National Cyberspace Center.
- Designed and implemented intuitive map interfaces using MapsUI, enhancing user experience and enabling seamless interactive map integration.
- Developed applications for industrial automation, leveraging C++ and the Fatek API for PLC communication.
- Enhanced responsiveness and usability of applications using Windows Forms and WPF frameworks.
- Executed XML to SVG conversions using X-DOM, ensuring dynamic and efficient data visualization.

Projects

Authentication & Authorization System

A secure authentication and authorization system using Auth0 for seamless user management.

Tech: Auth0, React, SQLite, TailwindCSS

Blazor Web App

A modern, interactive web application built with Blazor WebAssembly and .NET Core.

Tech: Blazor, .NET Core, SQLite, TailwindCSS

C++ Game Engine

A lightweight C++ game engine designed for 2D and 3D game development.

Tech: C++, C#, Git, Microsoft

WordPress Custom Theme

A fully customizable WordPress theme optimized for performance and SEO.

Tech: WordPress, HTML5, CSS3, Vite.js

Online Learning Platform

A web application that allows users to enroll in courses, watch video lectures, and take quizzes.

Tech: Blazor, Azure, Stripe, TailwindCSS

E-commerce Platforms

Facilitates purchases from international websites like Amazon and eBay, allowing customers to shop from these sites and have products delivered domestically.

Tech: C#, .Net, Ef Core, TailwindCSS
